DRUGS HAVE KILLED MOR PEOPLE THAN WAR, PESTILENCE W. C. Rotsler, 332 South Hancock street, Los Augeles, says: "Dr. McLaughlin's Electric Belt cure me of indigestion, kidney and rheumatic troubles after I had taken great quantities of drugs without being benefited. I take pleasure in recommending your treatment to all sufferers from similar allments." "Now this man took up my treatment and began applying Dr. McLaughlin's Electric Belt every night. In three weeks every pain and ache had left his body, and in another three weeks he reported himself cured of the kidney trouble which had bothered him for years. "How did Dr. McLaughlin's Electric Belt do this? Simply by removing the cause and giving nature the power to cure. The rheumatism was caused by the kidney trouble, and the reason for the kidney trouble was lack of strength and vitality in those organs. "Electricity, which is vitality. "So many people, upon finding themselves alling in any way, make a hurrled trip to the doctor to get a prescription. These people imagine that health is sold by the bottle and all that is necessary is to take some kind of medicine. "When you pay a doctor for a drug prescription you pay for a lot of monsense. That prescription may be an order for ten cents' worth of dope, yet you are

ANDFAMINE - DR. JNO. M. GOODE

"Medicine Not a Science," But An "Ineffectual Speculation." --- These and Other Unsparing Criticisms of Their Own Profession Are Made By Eminent Physicians---Los Angeles Doctor Tells Why Drugs Don't Cure .--- Electricity the Remedy of Toda,

SHALL WE THROW PHYSICS TO THE DOGS? Has

medical science made no progress, and are all drugs poisons?

"The science of medicine is founded upon conjecture and improved by murder," declares one of the greatest physicians in the world. Sir Astley Cooper, M. D., physician to the queen of England.

"Drug medicines do but cure one disease by producing another," assents Dr. Martin Payne, professor in the New York University Medical College.

"A mild mercural course and mildly cutting a man's threat are synonymous terms," says Professor Gliman, of the New York College of Physicians and Surgeons.

More and more eminent physicians are declaring each year that medical science has made little progress since the beginning of man.

Dr. M. O. Terry, formerly surgeon-general of New York, announced recently that in his opinion very few of the cases diagnosed as appendicitis were that disease at all, and says that in many cases where operations were performed for appendicitis a short vacation or a series of morning walks would have prevented the serious turn taken by the disease.

Dr. Osler, of "chloroform age" fame says: "Pain in the stomach nowadays is always appendicitis, and is recognized by the physician's wife over the telephone."

Dr. M. J. Rodermund of Milwaukee goes further than either of these. He declares: "It is an absolute impossibility for the appendix in a man to become ebstructed. I have witnessed and assisted in thirty-four operations of so-called appendicitis, but never have I seen a diseased appendix. Yes I have seen a number of healthy, blooming young men and women sent to the angels just because the surgeons wanted the fee of three to five hundred dollars. I mean just what I say; that it was absolutely the fee only, and the surgeons made no bones about saying so before the operation was performed."

formed."

NINETY PER CENT NOT APPENDICITIS.

Dr. A. B. Stockman quotes the statement of a physician at a meeting of physicians in Boston. This doctor has performed more operations for appendicitis than any other American doctor. He declared at the Boston meeting of doctors that 30 per cent of the cases in which he operated for appendicitis proved not to be that disease at all.

THE CONVICTION OF EXPERIENCE

I declare, as my conscientions conviction, founded on long experience and reflection, that if there were not a single physician, surgeon, midwife, chemist, apothecary, druggist nor drug on the face of the arth, there would be less sickness and less mortality than now prevail.—James Johnson, M. D., F. R. S.

"We always tell a patient and his friends that the operation was successful," he said.

A great French doctor said: "Nature is flighting with a disease. A blind man, armed with a disb—that is the physician—comes, lifts his club and strikes at random. If he hits the disease he kills it; if he hits the patient he kills him."

Dumoulin, another famous French doctor, said as he was dying: "I leave behind me two famous physicians—regimen and river water."

A physician, writing recently in one of the magazines

clans—regimen and river water."

A physician, writing recently in one of the magazines, said that the practice of medicine was not a science at all, and that no one could say that any cure had been made by medicine, because nature worked its own cure. There was great power in the human body to throw off disease, and in the majority of cases where the patient recovered it was not because of the medicine given but in spite of it.

"The cureer of medicine down the channel of the

disease, and in the majority of cases where the patient recovered it was not because of the medicine given but in spite of it.

"The career of medicine down the channel of the ages has been vexed by a constant ebb and flow of contrary opinions," asserted this physician. "History shows how many infallible remedies for disease have been vaunted and forgotten."

There was a time, not long ago, either, when bleeding was the sovereign cure for all diseases. In those days the physician bled the patient, no matter what the allment. How many thousands were killed by the doctors in those days we cannot even conjecture, any more than we can guess how many are being killed now by wrong and mistaken treatment. The medical fraternity has had many fads and fashions. At different times in the pass great faith has been put in witchcraft, charms, amulets, astrology, necromancy, alchemy, magic, mesmerism, hydropathy and other fads. There was a time when it was thought by doctors that all allments of the brain were caused by vapors collected within the skull and pressing upon the brain. The cure was to lay open the scalp and drill a hole through the skull to let the vapors out. Where is the physician who would do that now? Yet our own fad of opening a person's bowels and cutting off the appendix may be just as foolish. "There was a time, only a few hundred years ago, continues this writer, "when fever was treated with music; when human bones were ground up and drunk for the cure of ulcers; when human blood was prescribed for epilepsy. Aque Divina, a remedy advertised as having great virtue, was made by cutting in pieces the body of a healthy man who had died a violent death and distilling it with ground human bones. It was given as a draft."

MEDICINES ARE POISONOUS

In their zeal to do good, physicians have done much harm; they have hurried to the grave many who would have recovered if left to nature. All our curative agents are poisonous, and as a consequence every dose diminishes the patient's vitaliny.—Dr. Alonzo Clurk, Professor in the New York College of Physicians and Surgeons. Physicians and Surgeons,

This writer urges the medicat traternity to drop the nonsensical mystery with which it seeks to surround itself. Rhubarb will do as much good when ordered in English as in dog Latin, he says. Senna will not be a bit more agreeable as "Fol. Sen." nor cream of tartar as "Bitar, Pot." A mixture to be taken at bedtime might just as well be written that way as Mixt. h. s. Sumda." And pure water would be equally as efficacious if written that way as when written "Agus Pure." f written that way as when written "Aqua Pura." SCORES "PRESCRIPTION NONSENSE."

"This nonsense about the writing of prescriptions is on a line with all the other frauds of the medical pro-fession," says this writer. "It is a business of preten-tion, misrepresentations and frauds." Even such a high authority as the London "Lancet"

said in a recent issue:
"In 'medicines and surgery, as in all arts and sciences, methods become general, they lapse into disuse, to be revived possibly at a later period and then to achieve a popularity which attaches to a supposed new

achieve a popularity which attaches to a supposed new thing."

Some of the most eminent physicians were asked recently to give their opinions of medicine and medical doctors. A few of the replies are here given:

Dr. C. E. Page, Boston, Mass.:

"From the time in which the Father of His Country, affected by a simple and readily curable malady—pharyngitis—was killed by bleeding, up to the most recent catastrophe—Pebruary 3, 1997—of a needless operation for appendicitis, which killed a distinguished New York statesman, such operations have killed no end of good men and women."

Professor Oliver Wendell Holmes, who was for many years one of the medical faculty of Harvard Medical school, said before his class:

"The disgrace of medicine is that colossal system of self-deception in obedience to which mines have been emptied of their cankering minerals, the vegetable kingdom robbed of all its growth, the entralis of animals taxed for their impurities, the poison bags of rep-

als taxed for their impurities, the poison bags of rep-

tiles drained of their vanom, and all the conceivable abominations thus obtained thrust down the throats of individuals suffering from some fault of organization, nourishment or vital stimulation."

Professor Valentine Mott, the great surgeon, says: "Of all sciences, medicine is the most uncertain."

Dr. Abercromble, Feliow of the Royal College of Physicians of Edinburg, says: "Medicine has been called by philosophers the art of conjecturing, the science of guessing."

Dr. Jacob Bigelow, formerly president of the Massachusetts Medical Society, says: "The premature death of medical men brings with it the humiliating conclusion that medicine is still an ineffectual speculation."

Professor Gregory of the Edinburg Medical College

of medical men brings with it the humiliating conclusion that medicine is still an ineffectual speculation."

Professor Gregory of the Edinburg Medical College said to his medical class: "Gentiemen, 99 out of every 100 medical facts are medical lies, and medical doctrines are for the most part stark, staring nonsense."

Dr. Albert Leffingwell of the American Humane association says: "I do not believe that the average length of human life would be diminished by an hour if all the drugs of Christendom were dumped into the sea—barring, perhalf, half a dozen."

SAYS DRUGS MUST GO.

Dr. M. D. McLaughlin of Los Angeles, Cal., the man who proved that he was five years ahead of Professor Loeb in discovering that "electricity is life," says that the present system of drugging must be abolished.

Dr. McLaughlin is the inventor of the most successful device for electrifying the human body. His experience has been broad, covering a period of 22 years.

Dr. McLaughlin is recognized as one of the leading authorities on electrical treatment, and thousands of cured patients attest the success of his remedy.

Taiking to a reporter yesterday, Dr. McLaughlin said; "The old school doctor has had his day. His methods belong to the mystery and suspicion of the dark ages. "The physicians of today are doing just what the dortors of a thousand years ago did—dosing sick and suffering humanity with polsons.

"Any man who thinks for himself knows that poisons cannot build up heaith. They will give temporary relief by stupefying the nerves, but they don't remove the cause of disease. As long as the cause remains no cure can be effected.

"If you had a real fine watch and some part of its mechanism broke, would you try to mend it by filling it with oil? No, you would take it to the best watchmaker you knew and have him find the cause of the trouble and repair it.

"Your body is a far more delicate mechanism than

"Your body is a far more delicate mechanism than any watch. It is the most complicated machine on earth, yet when some vital part breaks down or fairs to work properly you try to make it go by doping yourself with poisonous drugs.

"All of your vital organs, including the heart stomach, liver and kidneys, are run by a power called nerve force. Any doctor will admit that. Nerve force is

trouble and repair it.

THE BEST DOCTOR

No doctor can cure all diseases. That's all "moon-shine." They are "pretenders."

If you can't cure a man, tell him so.

Physicians use too many drugs.

I believe that the best doctor is the one who knows the worthlessness of medicines.—Dr. Wm. Osier, in an address to physicians.

just another name for electricity. When any of these organs break down or become inactive sickness or disease results. Now, you can't cure the trouble until you remove the cause—repair the part that is broken down. The only way to do this is to give nature the power to do it. All you need is motive power, electricity. You can't get that from drugs. My method is to restore this electricity wherever lacking, and pain and disease will disappear. That's the natural way of curings. disappear. That's the natural way of curing.
"Suppose you have stomach trouble; food doesn't digest, gases arise when the food ferments, causing severe pains. You go to a doctor, who gives you a drug to stop the pain, but does not remove the cause.

Every time you eat the pain returns and you have to take drugs again. take drugs again.

"Now what's the reason the stomach won't digest the foods? Simply because it hasn't the strength. It needs energy, nerve power, vitality—not drugs which stimulate for a day and weaken the nerves.

"The world's greatest scientists have proved that the force which runs the human machine, the power that builds vitality and strength, is electricity. Then the only way to restore a week organ to a healthy condi-

builds vitality and strength, is electricity. Then the only way to restore a weak organ to a healthy condition is to restore electricity where it is needed. I do this with Dr. McLaughlin's Electric Bek.

'Dr. McLaughlin's Electric Bek! is a generator of a powerful, soothing current of electricity, worn about your body while you sleep. It sends a steady, unbroken stream of electric life coursing through your nerves and vitals for hours at a time.

'Its touch is gentle, without sting or burn. There is no shock. All you feel is a glowing warmth.

THE PRODUCT OF EXPERIENCE. "I have devoted twenty years to the perfection of my appliance. I have removed defects as fast as they appeared in actual use and have supplied new features from time to time, so that Dr. McLaughlin's Electric Belt is in a class by itself.

"Dr. McLaughlin's Electric Belt is equipped with special cells which are longer lived and more powerful than any other.

"The current can be regulated to any desired strength by the pressure of a finger upon the rheostadt."

strength by the pressure of a finger upon the rheostadt."

A. M. Bryan, Careaga, Cal., writes:

"The belt I purchased from you has been satisfactory
in every way. I had been troubled with rheumatism
and lumbago for several years, and would have it sometimes so bad that if I stooped to pick up something I
would fall as if struck with a club. I commenced to
get better from the moment I started to wear your belt
I am all right now, and have gained 20 pounds in
weight. Your belt is all right. It will cure rheumatism
and lumbago. I can say that much for it."

H. T. Parker, president Nemberry-Parker Co., Riverside, Cal., writes:

"I have perfect candor in expressing my great surprise at the marvelous results following the use of
your Glant Belt for three months. When I first came
to see you I was but a frame; had no strength, no
appetite, no vim. Physicians had tried their best efforts to bring me rellef with no success. I then decided
to try your best belt in the hope that I would get
help. I may frankly say that the results were beyond
anything I had hoped for. I am now a vigirous man;
my stomach can digest anything: I am free from nervousness and I have gained 23 pounds in three months.
Any time and every time I can say a good word for it
I do so, for it is justly due to you and your perfect
belt."

P. I. Vealey, Terminal Island, Cal., says:

belt."

P. I. Vealey, Terminal Island, Cal., says:

"I am able to give you good news, for your Electric Belt, has done wonders for me in a very short time. My weight has increased perceptibly; I look less worn and haggard; have no pain in the kidneys; there is an increase in size and strength in the sexual organs, and what I think is very remarkable is the cure of an old rupture which doctors told me only could be cured by use of the surgeon's knife. I must say that the value of your Electric Belt to me has not been a cent

less than \$500, so that the price I paid you is a mere pittance. The beauty of your treatment is that it can reach several symptoms at the same time. Physicians using drugs have been handleapped through their inability to reach more than one symptom at a time, as the system will not stand the concerted action of half a dozen drugs. Electricity, as you use it, through your Belt, helps Nature fight off six or seven symptoms as easily as she can battle with one. Remember, doctor, that you are welcome to refer anyone you wish to me for information in regard to the grand cure I received through Dr. McLaughlin's Electric Belt."

E. J. Warcham, R. D., Bakersfield, writes:

"A friend of mine from Los Angeles has just written to me asking whether or not I found your treatment a permanent cure and it was a great pleasure to me to write and tell him that I have. I purchased one of your high grade Belts two years ago to cure a bad case of sexual weakness; complicated, with neuralgia and theumatism; but in two months I was a very different man; completely restored in health. Since then I have not had a relapse of any kind, not a trace of the severe

pains I formerly suffered has returned, and I have not had any emission. I heartly indorse your treatment to my inquiring friends. I am writing to let you know that I shall be glad to have you publish this letter, for it may bring to the knowledge of some sufferer the news that there is hope for him, and if at any time I can do anything in the way of recommending your treatment I certainly shall be pleased to do so."

mending your treatment I certainly shall be pleased to do so."

H. E. Englehardt, Congress, Ariz., says:

"I had suffered a number of years from weak kidneys and lame back when I bought one of your high grade Belis, and I am pleased to tell you that it has done me more good than all the physicians and drug treatments I had tried before beginning your treatment. I have been wearing your Belt for about two months now and I am a different man. I have not had any emissions since I began to use the Belt and before that my case was no exception to the general rule. I am grateful for your kind interest and ready willingness to give me all advice."

Mr. E. E. Beebe, Kirkland, Ariz., writes: "Your Belt cured me of varicoccle and sexual debility, and I would not take \$1000 for it if I could not get another."

F. P. McDonald, railway man, 307 South Third, Tueson, Ariz., says: "I was cured of rheumatism and lame back by your Belt."

J. S. Corby, Morenci, A. T., writes: "Your Belt cured my rheumatism and debility."

Mr. W. H. Hedrick, Loc. Eng. Santa Fe, 2424 Michigan avenue, Los Angeles, says: "I received great benefit from your Belt. It cured my 'railroad back' and rheumatism."

Mr. H. Hammer, Box 964, Coronado, Cal., writes: "I

Mr. H. Hammer, Box 964, Coronado, Cal., writes: "J have confidence

ave confidence in recommending your Belt as a ure cure for varicocele and attendant weakness."

Mrs. Emille Barrow, High Island, Texas, says: "I was ured of female troubles and bowel complaint through

oured of Jemaie trouves and lower companie through your Belt."

Mr. H. P. Bennett, Cherry Creek, Nev., writes: "I am surprised with the results obtained from your Belt."

"I know that many people are skeptical about testimontals, and they have reason to be. Quacks and patent medicine makers have fooled the public so often by printing bogus letters that it is hard to believe any. Every testimonial I publish is genuine, and I have a standing reward of \$1999 for proof that any of them were bought. DON'T TRY TO FOOL NATURE.

"Few people realize the danger in drugs until their health is gone or their nerves and vitals wrecked by poisonous mixtures.

"Then you can understand how useless it is to try

to fool nature with stimulants, narcottes and poisons.
"The ostrich hides its head and thinks he is out of reach of the hunter's rifle. Some people do things just as absurd.
"You cover up the symptoms of a disease and im-

as absurd.

"You cover up the symptoms of a disease and imagine you are cured. Just as soon as you stop using the drug the trouble returns worse than ever.

"You have got to remove the cause before you can cure any ailment.

"If you have a splinter in your finger, the only way to get rid of the pain and infiammation is to get the splinter out. Of course, you could take morphine or cocaine and relieve all pain for a while, but that wouldn't remove the splinter which causes it.

"The reason for nearly every chronic aliment or disease is a want of vitality and energy by some part of your body machinery.

"A man came to me for treatment a few weeks ago, who had taken five bottles of poisonous drugs. He got the stuff from a doctor for the cure of chronic kidney trouble and rheumatism.

"Of course, the patient did not know the nature or the medicine he had been using until I analyzed the contents of one of the bottles. The mixture contained morphine, potash and alcohol, in large quantities. He and weak, why his stomach went back on him, and his food wouldn't digest. He realized also that if he had would have become a drug slave, just as thousands of others have who went to doctors for relief.

"That's the way all drugs work. They will stop a pain comes back in a few hours and you have to repeat until the cause is removed

"Compared with Dr. McLaughlin's Electric Belt all other electric body appliance.

pain comes back in a rew nours and you have to repeat the dose. The trouble is there and will remain there until the cause is removed

"Compared with Dr. McLaughlin's Electric Belt all other electric body appliances are inventions of the blacksmith's hammer.

"It is not upon that point, however, that my success has been founded. My immense business is due to my knowledge of the effect of electricity upon the all-when you consider that electricity which I supply is life to the organs into which I send it, you can see my cures. If I did not cure, my business would have worn out long ago.

"When I say that my remedy cures, I don't ask you to believe me until I prove it. I have one or more cured patients in nearly every town on the map, I'll send you the names of those near you, and you can ask them about my treatment."

Terrible Indictment of Medicines The effects of our medicines on the human system are in the highest degree uncertain, except, indeed, that they have destroyed more lives than war, pestilence and famine combined.—John Mason Goode, M. D., F. R. S.

KILLED KILLED KILLED KILLED FAMINE BY PEST-WAR ILENCE. BY DRUGS.

none the wiser and the druggist charges a dollar for none the wiser and the druggist charges a dollar lo-it just because it is written in secret symbols. The reason for all this prescription nonsense is clear. You don't know what you are getting and the druggist can charge as much as he likes. He then divides the profit with the doctor.

"When I take your case my alm is to cure. You pay one price for my treatment and that is all you pay. If I know that I can't cure you I'll tell you so in the beginning. I don't want money that I don't earn. "Doctors the world over are using electricity more and more in the treatment of chronic aliments. They are fast learning what I have claimed for years, that the only way to cure disease is to help nature cure it. Drugs never did and never will do that, and I defy any man on earth to prove that they do.

"Poor digestion, inactive liver, consumption, sluggish heart, slow thinking, dormant energy and laziness are all due to lack of electricity. Understand that electricity is the motive power of the human machine, the power that keeps the organs active, and you will see what I mean. In such cases you will see how Dr. McLaughlin's Electric Belt will, pump action into the body. It renews the electric life and transforms the sluggard into a bundle of vigorous energy.

THE SECRET OF SUCCESS.

"The reason so many men fail at everything they attempt is because they are 'quitters.' They have not 'Give me a han who is kept down by loss of energy backwardness, despondence, lost vitality or weakness the courage and ability to tackle and overcome the obstacles they encounter.

"Give me the man who is kept down by loss of energy, backwardness, despondency, lost vitality or weakness of any kind, and I will make a new man out of him by filling his nerves with the fire of life—electricity.

DRUGS CANNOT CURE

Of all the errors of our blundering world, the most far-reaching has been the blind faith in the cara-tive power of drugs. Drugs do not cure, cannot cure. They can at least merely relieve, and that assuilly at great cost and injury to the body—W. R. C. Latsun, M. D.

"It is the man with 'backbone' that gets the good job. It is the aggressive hustler that gets the promotion when there is ony promotion. A man without energy has no inclination to hustle. Don't go around dragging one foot after the other. Get some life in you. Build up your courage and vim with Dr. Mc-Laughtin's Electric Belt.

"Pick out the men who have used Dr. McLaughlin's Electric Belt and you will see men of force, men of power and confidence, men who respect themselves and are respected and admired by their fellow men.

WOMEN SAVED FROM BUTCHERY.

"Thousands of women submit to dangerous opera-tions which could be easily avoided by the use of Dr. McLaughlin's Electric Beit. But the average woman imagines that the only thing to do, after drugs fail, is to resort to the surgeon's knife.

"Most female complaints are the result of low vi-tality or weak, impoverished nerves. Where there is a deficiency of vital nerve force there is bound to be sluggish action of the organs affected, and then dis-

"Dr. McLaughlin's Electric Belt saturates the nerves with a gentle stream of electric life, enabling them to keep up a vigorous and regular action of all the or-gans of the body. Dr. McLaughlin's Electric Belt

builds up vitality and strength in every weakened part, thereby removing the cause of disease.

"A great number of people suffer from pains and aches called rheumatism, or lumbago, or neuralgia, caused by impoverished nerves crying for aid. The life of these nerves is electricity, and nothing else will cure them. I can send a gentle current from Dr. Mc-Laughlin's Electric Belt so that it will convey the life direct to the alling part and relief is often felt in an hour. I frequently cure such cases in ten days. "A patient asked me the other day why it is that Faradic batteries and static machines do not give such results as Dr. McLaughlin's Electric Belts.

"That's because you can't stand the treatment for more than half an hour at a time. A nervous person can't endure it that long on account of the shock. When a man tries that method and finds that it does not help him, he naturally concludes that electricity

"Now my system is different. I infuse the current into the body for six or eight hours every day or night, usually while the patient sleeps. "The delicate nerves are not jarred or shocked by this current, as it goes in them just like a drizzling rain saturates a newly plowed field. They absorb it, drink it in, and as it is their life, they grow strong

ABOUT DOCTORS WHO ADVERTISE,

There is a whole lot of prejudice against doctors who advertise, due no doubt to the large number of quacks and schemers that have foisted worthless treatments on the public during the past few years. "If it were not for this prejudice I would not be able to handle all the business that would come to me. The many fake electric belts and batteries advertised by chariatans have made everyone skeptical but I know that I have a good thing and I'll hammer away until everybody knows it.

"Any organ of the body any test that lake

"Any organ of the body, any part that lacks the ecessary vitality to perform its natural functions, can e restored by my method.

"It gives strength, it makes the blood rich and warm; it vitalizes the nerves and puts vim into the brain and muscle; it just makes a good man out of a bad one in every way.

With Dr. McLaughlin's Electric Belt I cure rheu-matism in its worst forms, I cure pains and aches, weak nerves, general debility and any other trouble which can be cured by restoring strength.

"No matter where you live I can treat you as suc-cessfully as if you were here in my office."

BOOK WORTH SI, FREE.

To any man or woman who will mail me this coupon I will send free (closely sealed), my finely illustrated book regarding the cause and cure of disease. This book is written in plain language, and explains many secrets you should know. secrets you should know.

Don't spend another cent on doctors and their worth-

ss medicines. Dr. McLaughlin's Electric Belt cures to stay cured.

You should know about it.

Don't wait another minute.

Cut out this coupon right now and mail it, if you can't call. I'll send the book without delay, absolutely. Free Test of Dr. McLaughlin's Electric Belt to those who call. Consultation free.
